Profile

Computer Science third year at Texas A&M University with experience in full-stack, AI, and VR development. Skilled in algorithms and systems design for building efficient, user-focused software.

Education

Texas A&M University, College Station, TX *Aug 2023 – May 2027*
Bachelor of Science in Computer Science
Minors: Mathematics, Game Design and Development
GPA: 3.73 / 4.0
Lechner Scholar Recipient • Engineering Honors

Experience

LIVE Lab, Texas A&M University — *Undergraduate Research Assistant* Aug 2024 – Present

- Built an AI-driven VR rehabilitation assistant using Retrieval-Augmented Generation (RAG) for accurate guidance with reduced hallucination.
- Integrated IMU sensors and motion-capture systems for precise movement tracking in VR-based stroke rehab.

AGGIES Lab, Texas A&M University — *Research Assistant* Dec 2024 – Present

- Developed AI tools to study gender dynamics and cybercrime in social media datasets.
- Published and presented findings at the European Conference on Social Media (ECSM 2025).
- Led IRB compliance for human-subjects AI research.

Teaching Assistant, Discrete Structures for Computing Aug 2025 – Present

- Assisted instruction and grading for 300+ students covering logic, set theory, and proof techniques.
- Provided structured feedback and supported student learning through office hours and review sessions.

Projects

Boba Bliss POS System *Team Project – Software Engineering, 2025*

- Led a team of four as **Project Leader & Scrum Master** to build a full-stack POS system with cashier and manager portals.
- Implemented menu management and role-based permissions using **Python, Flask, PostgreSQL**.
- Developed a responsive **React** frontend and coordinated agile sprints with GitHub-based workflow.

MelodyMap – Music Review & Sharing App *Personal Project – In Progress, 2025*

- Designing a social app for users to rate, review, and share albums and songs.
- Building **React + Flask + PostgreSQL** stack with RESTful APIs for profiles and reviews.
- Planning playlist-sharing and recommendation features.

VR Stroke Rehabilitation Assistant *LIVE Lab, 2024*

- Created an AI-driven VR assistant using **RAG** for real-time, medically accurate rehab feedback.
- Integrated IMUs and motion-capture tech for precise movement tracking.
- Co-authored IRB proposal and contributed to deployment planning.

Skills

Languages: Java, C++, Python, C#, Haskell, HTML/CSS, JavaScript, x86 Assembly
Frameworks & Tools: React, Flask, PostgreSQL, Unity, Unreal Engine, AWS, Git
Focus Areas: Software Engineering, Full-Stack Development, AI/ML, Game Design, VR Systems

Honors & Awards

Second Place – Student Research Week, Computational & Data Sciences (2025)
Lechner Scholar • Engineering Honors • ECSM 2025 Presenter
